

Phonocell SX5e Dual Band GSM 900/1800 MHz Fixed Wireless PBX Terminal Kit

The **Phonocell SX5e Dual Band GSM 900/1800 Phase 2+ Fixed Wireless PBX Terminal (FWT)** connects to either the trunk or extension side of a PBX, allowing for call flow management between landline and wireless services where GSM 900 or GSM 1800 networks are available. The SX5e GSM PBX Terminal also provides GPRS packet data, digital computer fax, and circuit-switched data to access the Internet or send and receive e-mails and faxes. *Data services are subject to network capability. Consult Telular Corporation for non-kit pricing.*

Standard SX5e Dual Band GSM 900/1800 Kit includes the SX5e, antenna, power supply with the appropriate power plug for your region, and operator's manual. See the Power Plug Selection chart below to determine the appropriate country code (XX).

Kit Model Number	
SX5e-G98L-00-XX	

SX5e Dual Band GSM 900/1800 Kit with Battery Backup (BBU)

is the same as the Standard SX5e Dual Band GSM 900/1800 kit above with an external battery backup unit with power supply and one (1) 6-volt, 4 AH lead acid rechargeable battery. The Battery Backup Unit provides limited uninterrupted talk time and standby operation in the event of AC power failure.

Kit Model Number	
SX5e-G98L-11-XX	

SX5e Dual Band GSM 900/1800 Kit with Battery Backup (BU) and No Battery is the same as the SX5e Dual Band GSM 900/1800 Kit with Battery Backup (BBU) above without battery.

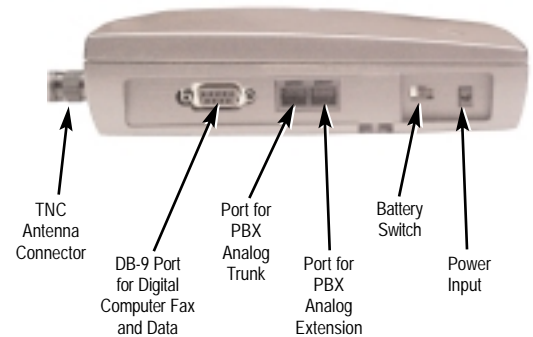

Kit Model Number	
SX5e-G98L-10-XX
