zBoost Dual Band Mobile Booster For Home and Office

zBOOST YX520-i

- Increases indoor mobile coverage up to 250 sq m
- Supports multiple users simultaneously
- Setup is easy: Place the receiving antenna where you get signal and place the Base unit in the home or office where you want a stronger signal
- Compatible with mobile devices using 900 & 1800 MHz frequencies

Benefits of zBoost

zBoost® Products:

- Eliminate most dropped or missed calls
- Extend cell phone battery life
- Work with your mobile phones, smartphones & wireless data cards
- Protect the operator network using patent-pending technology
- Improve signal strength for voice and data transmission
- Easy set-up: Package includes everything you need to create a zBoost® Cell Zone™

About zBoost By Wi-Ex

zBoost®, by Wi-Ex®, the leading provider of consumer cell phone signal boosters, enhances the signal performance of your:

- Cell Phone
- Smart Phone, such as, iPhone, Blackberry and PDA
- Wireless Data Card

zBoost® not only increases signal for voice transmission, it also increases signal and speed of aircards.

zBoost® provides solutions for the 70% of cell phone owners experiencing problems with their cell phone service, including dropped calls, poor signal reception or dead zones.

There are several obstacles that can contribute to the poor reception you receive indoors:

- Location of the cell phone tower in relation to you
- Obstructions caused by buildings, terrain and trees

zBoost® improves indoor cell phone signal by capturing and enhancing outside signal, then bringing it indoors.

zBoost Single Frequency Mobile Booster for Home and Office
